

# Time saved spent on the community

United Way has a goal to be the primary community solutions leader for human services, striving to help improve the lives of every person in Rutherford and Cannon counties by advancing opportunities for education, health and financial responsibility. When their payroll provider was not offering the types of services they hoped for, another solution was needed. Stan Jackson, vice president of finance and administration, shares his thoughts and experiences with ADP®:

## Finding the right solution with RUN

We were using a regional payroll provider but they were very expensive, especially for the limited amount of features they offered. We knew we wanted a lower-cost and more flexible option. When we met with our sales rep, Garrett, he provided us with a demonstration of RUN Powered by ADP ("RUN") and soon after, we made our switch to ADP.

*When we launched RUN in May 2018, I immediately experienced a difference in terms of ease of use and the amount of time I have saved.*

In the past, I was manually completing time sheets, checking on PTO balances, referencing outdated spreadsheets and a number of other time-consuming payroll-related activities. Now, with the employee portal, our staff can access their information quickly and easily resulting in less questions or concerns directed at me. As a result, using RUN has reduced several hours of payroll-related work, which has allowed me to allocate that time to directly focus on the work we're doing for our community.

Always Designing  
for People®

United Way  
of Rutherford &  
Cannon Counties

Using RUN has helped simplify our payroll needs, but just as importantly it's produced time savings that allows me to devote more of my time to develop solutions and opportunities for the people of our community we are trying to help.

and Administration

### Time saved with RUN devoted to community solutions

I have been with United Way for almost eight years. In that time, I've seen a real need to help provide the people of Rutherford and Cannon counties with opportunities that have — in the past — not been available. I am working to help improve and give back to the community where I both live and work. Using RUN has helped simplify our payroll needs, but just as importantly it's produced time savings that allows me to devote more of my time to develop solutions and opportunities for the people of our community we are trying to help.
